## ***REASONS FOR ALLOWANCE***

### ***Drawings***

1. Figures 4-5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The empty boxes in the Figures 1-3, 7, and 12 should be labeled.
3. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application as indicated in paragraphs 1 and 3 above. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### ***Allowable Subject Matter***

4. Claims 1-14 are allowed.
5. The following is an examiner's statement of reasons for allowance: none of the prior art of the record discloses or suggests a synchronization method for a distributed

control system including a transmission unit transmitting cyclically emitted synchronization signals, a reception unit receiving and feeding synchronization signals to a clock generator via a phase regulator of a phase locked loop, comprising steps: calculating a subordinate uniform correction value for each clock pulse of the subordinate clock signal; and correcting the subordinate clock signal based on the correction value such that instantaneous phase error is substantially uniformly distributed over the pulses of the subordinate clock signal between the first and second synchronization signals; and correcting the subordinate clock signal such that the clock pulses of the subordinate clock signal are essentially equidistant from one another by applying the instantaneous phase-regulated value substantially uniformly over the clock pulses of the subordinate clock signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
